

Quiz Agile - Results

Attempt 2 of 3

Written Oct 23, 2023 2:49 PM - Oct 23, 2023 2:50 PM

Attempt Score **10 / 10**

Overall Grade (Highest Attempt) **10 / 10**

Question 1

1 / 1 point

The assigned reading instructed you to be prepared to name all twelve principles of the Agile Manifesto.

- ☐ True
- ✓ ☒ False

Question 2

1 / 1 point

The 12 principles of the Agile Manifesto are, "Our highest priority is to satisfy the customer through early and continuous delivery of valuable software. Welcome changing requirements, even late in development. Agile processes harness change for the customer's competitive advantage. Deliver working software frequently, from a couple of weeks to a couple of months, with a preference to the shorter timescale. Business people and developers must work together daily throughout the project. Build projects around motivated individuals. Give them the environment and support they need, and trust them to get the job done. The most efficient and effective method of conveying information to and within a development team is face-to-face conversation. Working software is the primary measure of progress. Agile processes promote sustainable development. The sponsors, developers, and users should be able to maintain a constant pace indefinitely. Continuous attention to technical excellence and good design enhances agility. Simplicity--the art of maximizing the amount of work not done--is essential. The best architectures, requirements, and designs emerge

from self-organizing teams. At regular intervals, the team reflects on how to become more effective, then tunes and adjusts its behavior accordingly."

- ✓ ☐ True
- ☐ False

Question 3

1 / 1 point

The Agile Manifesto declared that process and documentation has zero worth and should be ignored

- ☐ True
- ✓ ☐ False

Question 4

1 / 1 point

The Agile Manifesto values working software over comprehensive documentation

- ✓ ☐ True
- ☐ False

Question 5

1 / 1 point

Agile and Scrum are synonymous

- ☐ True
- ✓ ☐ False

Question 6

1 / 1 point

Which of the following methods support the Agile philosophy

- ✓ ☐ Scrum
- ✓ ☐ Iterative
- ✓ ☐ Incremental
- ✓ ☐ Overlapping

Question 7

1 / 1 point

In a truly Agile organization teams are self organizing which means each developer gets to decide what team they want to work on, which tasks they want to work on, how long they want to work each day, and what raises they should get

- ☐ True
- ✓ ☒ False

Question 8

1 / 1 point

If noone on an Agile team knows how to do something (e.g. integration testing) then the team skips that part of software development.

- ☐ True
- ✓ ☒ False

Question 9

1 / 1 point

Agile is a philosophy of project management. It is not a specific process or methodology. For it to work, the entire team, the customer and the organization wherein the team works must agree to work collaboratively and adopt the Agile philosophy. In Agile, business people and developers must work together daily throughout the project.. Does all this sound feasible to you? (Yes or No)

Answer: Yes ✓

Question 10

1 / 1 point

Agile projects fail at the same rate as non-Agile projects

- ✓ ☒ True
- ☐ False

Done
