○ <mark>All of the above</mark>

○ None of the above

Question 2   1 / 1 point

Why is Project Management hard?

☐ It's a trick question, Project Management is actually quite simple

☐ Nobody wants to do it

☐ <mark>Noone knows how long it will really take to complete the work</mark>

☐ <mark>Team composition is often unknown</mark>

☐ <mark>Requirements are often poorly stated and rarely complete</mark>

Question 3   **1 / 1 point**

A typical project plan is made up of

☐ A list of tasks that may or may not have technical or resource dependencies on other tasks

☐ A list of tasks that have to be done one at a time

☐ A list of independent tasks that can be done in any order or concurrently

Question 4   **1 / 1 point**

What is the definition of done

☐ It's done when you run out of time to work on it

☐ A set of quantitative (non-subjective) criteria that includes all necessary deliverables

☐ It's done when the project manager says its done

☐ It's never really done

Question 5   **1 / 1 point**

Progress reporting to the customer should

☐ Be representative of the true status of the project at the time of the reporting

☐ Focus on the good news and hide the bad news

☐ Not be needed because they get what they get when they get it

☐ Include so much detail that they can't really determine what is going on

☐ Always make the customer feel good about the project no matter what

Question 6   **1 / 1 point**

Map each scenario to its suggested action(s):

__1__	Risks that are highly probable and highly impactful to a project	1.	must be actively managed.
__3__	Risks that are improbable and highly impactful	2.	may only need a mitigation plan or workaround ready to put into place should the risk materialize.
__2__	Risks that are highly probable but have a low impact to a project	3.	would benefit from having a mitigation plan depending on how improbable.
__4__	Risks that are improbable and low impact	4.	might be documented but no action taken.

Question 7   **1 / 1 point**

Developers on projects should make changes to the project plan, scope, or requirements as they see fit since they are so close to the code.

○ True
○ **False**

Question 8   **1 / 1 point**
