Quiz Scrum - Results   ✕

Attempt 2 of 3

Written Oct 30, 2023 2:42 PM - Oct 30, 2023 2:44 PM

Attempt Score **12 / 12**

Overall Grade (Highest Attempt) **12 / 12**

Question 1   1 / 1 point

Match the following roles with their definition:

✓ __3__ Responsible for determining how to deliver what the product owner has asked for

✓ __2__ Responsible for guiding the team in creating and following its own process based on the broader Scrum framework.

1. Product Owner

2. Scrum Master

3. The Sprint Team

✓ __1__ Responsible for what will be developed and in what order.

Question 2   1 / 1 point

The Product Owner is NOT responsible for which of the following

○ Manages the Product Backlog

○ Orders Backlog items to best achieve the goals

✓ ○ Assigns backlog items to be worked each sprint

○ Writes acceptance tests for each user story

Question 3   1 / 1 point

The Sprint team is also known as the development team because it consists entirely of software developers

○ True

✓ ○ False

Question 4   1 / 1 point

The Sprint team determines which product backlog items will be taken into a sprint backlog during sprint planning

✓ ○ True

○ False

Question 5   1 / 1 point

The Sprint team size should be >= 3 and < 10 (Not counting the scrum master or product owner) because

✓ ☐ <mark>Too many people and the communication and collaboration strategies laid out in Scrum won't be effective</mark>

✓ ☐ <mark>Too few and you don't have enough mix of skills to be productive</mark>

✓ ☐ This is how many direct reports you have to have in order to justify a manager's salary

✓ ☐ No reason, it's a made up thing and teams can be any size they want to be

Question 6   1 / 1 point

The product backlog must be fully broken down to task level items before any sprint can be started.

○ True

✓ ○ False

Question 7   1 / 1 point

The product backlog is prioritized by the product owner

✓ ○ True

○ False

Question 8   1 / 1 point

The Scrum Master is just another name for Project Manager because they are responsible for tracking all the team's progress and collecting status from each team member during the daily standup.

○ True

✓ ○ False

Question 9   1 / 1 point

An Epic is an item in the product backlog that is really cool and everyone wants to work on (as in "this item is totally epic"

○ True

✓ ○ False

Question 10   1 / 1 point

The product owner is only responsible for writing the Epics for the product backlog and the sprint team has to decompose them into themes, stories, and tasks

○ True

✓ ○ False

Question 11   1 / 1 point

A User Story cannot exist in the product backlog without a corresponding theme and epic.

○ True

✓ ○ False

Question 12   1 / 1 point

A User Story SHOULD have acceptance criteria (usually written by the Product Owner) before the Sprint Team can bring it into sprint planning

✓ ○ True

○ False

Done
